Table 6.1 Local examples of digital entrepreneurship

LEARN IT

Digital entrepreneurship can begin from **ordinary problems**. The examples below are close to the context of Sindh and Pakistan, where many students, parents, and small service providers already use mobile phones.

Problem	Digital Idea	Possible First Users	Urdu Context
Parents miss college notices.	WhatsApp notice and reminder service.	Parents of first-year students.	والدین تک کالج کے نوٹس پہنچانے کے لیے واٹس ایپ سروس۔
Small embroidery shop has few customers.	Simple catalogue with order form on Facebook or WhatsApp.	Customers in the same city.	کڑھائی کی دکان کے لیے واٹس ایپ کیٹلاگ۔
Students forget test dates.	Google Calendar guide or simple reminder app.	Grade XII students.	ٹیسٹ کی تاریخیں یاد دلانے والی ایپ یا کیلنڈر۔
Canteen has long queues during break.	Pre-order form for snacks.	Students and teachers.	کینٹین کے لیے پری آرڈر فارم۔

Read each row from left to right: a **problem** → a **simple digital idea** → a **small group of first users**. You will see these same examples again later in the chapter (the canteen pre-order system becomes a full case study).

WORKED EXAMPLE

Worked example: adding your own row. Follow the same pattern for a new local problem.

Problem	Digital Idea	Possible First Users
Students in a Mirpurkhas college lose water bottles, calculators and ID cards and never find them.	Lost-and-found Google Form plus a WhatsApp group where found items are posted with a photo.	Students of one college.

Check: Is it a **real** problem? Yes, it happens every week. Is the idea **simple**? Yes, a form and a group. Are the first users **reachable**? Yes, they are in the same college.

COMMON MISTAKE

Important: A digital business idea should **not** be selected only because it sounds modern. It should solve a **real problem for real users**. If the problem is weak, the business idea will also be weak.

For example, "an AI app that chooses your shirt colour" sounds modern, but if nobody actually struggles with that, nobody will use it.

REMEMBER IT

Think "Problem first, tool second." Start with the pain, not with the technology.

اردو میں سمجھیں

جدول 6.1 بتاتی ہے کہ ڈیجیٹل کاروبار عام مسائل سے شروع ہو سکتا ہے، جیسے والدین کا کالج نوٹس نہ دیکھ پانا، کڑھائی کی دکان پر کم گاہک، ٹیسٹ کی تاریخ بھول جانا یا کینٹین پر لمبی قطار۔ کوئی خیال صرف اس لیے نہ چنیں کہ وہ جدید لگتا ہے؛ اسے حقیقی لوگوں کا حقیقی مسئلہ حل کرنا چاہیے۔

CHECK YOURSELF

1. In Table 6.1, what digital idea is suggested for a small embroidery shop?
2. Who are the possible first users of the canteen pre-order form?
3. Why should an idea not be chosen only because it sounds modern?

Answers: 1. A simple catalogue with an order form on Facebook or WhatsApp. 2. Students and teachers. 3. Because it must solve a real problem for real users; a weak problem gives a weak business idea.
