Lecture 14 of 17

5.5 Equity and Equal Access in Digital Collaboration

LEARN IT

Collaboration tools are vital for online learning and teamwork. To use these tools fairly, all users must participate **without barriers**. You must understand the difference between **equal access** and **equity**.

Equal access

Giving everyone the **exact same** opportunity, tools and resources.

Example: providing every student with the **same login ID** to access a Zoom class.

Equity

Giving **additional, specific support** to users who need it, so they can reach the **same outcome**.

Example: turning on live **subtitles/captions** in Zoom specifically for a student who has hearing difficulties.

Equal access is the same starting kit. Equity is extra help so a person who faces a barrier can still finish the race with everyone else. Fair collaboration needs **both**: the same Zoom link for all (equal access) **and** captions, recorded lectures or a low-data app where needed (equity).

WORKED EXAMPLE

Worked example: one class, two ideas. A teacher in Thatta starts online classes.

Equal access: every student receives the same Zoom ID and password. That is fair in the sense of "same tool," but a student with hearing loss still cannot follow the spoken lecture, and a student in a village with a weak 2G signal cannot join video.

Equity: the teacher turns on captions, posts a low-size audio recording, and accepts the assignment as a Google Doc in the browser (not only through a heavy app). Now those two students can reach the **same learning outcome**.

REMEMBER IT

Equal = same tools. Equity = extra support for the same outcome. Same shoes for all vs a ramp for the wheelchair user.

COMMON MISTAKE

Mistake: "We gave everyone the same login, so the class is fair."

Fix: Same login is equal access only. If some students still cannot hear, see, afford a smartphone, or get electricity, you still need equity.

اردو میں سمجھیں

مساوی رسائی (Equal Access) سب کو ایک جیسے اوزار دیتی ہے، جیسے ایک ہی زوم لاگ ان۔ انصاف (Equity) ضرورت مند کو اضافی مدد دیتی ہے تاکہ وہی نتیجہ نکل سکے، جیسے سماعت کی مشکل والے طالب علم کے لیے زندہ ذیلی عنوانات (Captions)۔ منصفانہ تعاون کے لیے دونوں چاہییں۔

CHECK YOURSELF

1. Define equal access in one sentence.
2. Define equity in one sentence.
3. Why are Zoom captions an example of equity, not merely equal access?

Answers: 1. Giving everyone the exact same opportunity, tools and resources. 2. Giving additional, specific support so users who need it can reach the same outcome. 3. Because they are extra support for a student with hearing difficulties, not the same identical tool given to all.
