6.1 Introduction to Digital Literacy

LEARN IT

Digital literacy is the ability to understand and use digital devices, the internet, and online tools in a **safe, effective, and responsible** manner.

Look at the three key words:

- **Safe** – you protect yourself and others online (for example, you do not share passwords or private details).
- **Effective** – you get the job done well (for example, you find the right information quickly).
- **Responsible** – you use information honestly and fairly (for example, you do not copy someone else's work or spread false news).

In our increasingly digital world, digital literacy is essential for **everyone**, not only for computer experts. It enables you to:

- **find** information,
- **communicate** with others,
- **produce** digital content, and
- **solve problems** through technology.

Did you know? Digital literacy is not only *using devices*; it is *using digital information safely and wisely*. A digitally literate student can:

Locate information → Organise it properly → Turn it into something useful → Share it responsibly

WORKED EXAMPLE

Is this student digitally literate?

Ali can type fast and plays games on his phone all day. When his teacher asks him to find the population of Karachi, he copies the first number he sees on a random website and does not check where it came from.

Step 1 – Can he use devices? Yes. He has basic skills.

Step 2 – Can he locate and judge information? No. He did not check whether the website was reliable.

Step 3 – Conclusion: Ali has *computer skills* but is not yet fully *digitally literate*. A digitally literate student would compare two or three trusted sources (for example, the Pakistan Bureau of Statistics website) before using the number.

REMEMBER IT

Remember the four verbs of a digitally literate student: **Locate – Organise – Create – Share** ("**LOCS**": think of a *lock* that keeps your digital life safe).

COMMON MISTAKE

Mistake: "Digital literacy means knowing how to use a computer." **Fix:** Using a computer is only the start. Digital literacy also means finding, judging, creating and sharing information safely and responsibly.
