6.2 Entrepreneurship in the Digital Age ★ Golden

LEARN IT

Entrepreneurship in the digital age means using **digital tools** to **start, test, improve, and grow** a business idea.

These tools may include **mobile phones, social media, websites, online forms, digital payments, maps, videos, and simple apps**. In Pakistan you already know many of them: WhatsApp, Facebook, Instagram, TikTok, YouTube, Google Forms, Google Maps, and digital payments such as JazzCash, Easypaisa or Raast.

The power of digital tools

A digital entrepreneur **does not always need to create a complex mobile app**. Sometimes a **WhatsApp group**, a **Google Form**, a **Facebook page**, or a **simple website** is enough to test an idea.

In the past

- Large investment needed.
- Offices and shops had to be rented first.
- Long planning before anyone saw the product.
- A failed idea meant a big loss.

Today (digital age)

- A small idea can be tested **quickly**.
- Free tools: WhatsApp, Google Forms, Facebook.
- Feedback arrives in hours or days.
- If users do not like the idea, the team can **change it before spending too much money**.

WORKED EXAMPLE

Real-world relevance (from the source).

Example 1: A student selling **handmade cards through Instagram**. She posts photos of her Eid cards, people message her, and she delivers. No website, no app.

Example 2: A shopkeeper creating a **WhatsApp catalogue for Ajrak**. WhatsApp Business lets him list each Ajrak with a photo and price. Customers in Hyderabad or Karachi browse and order through chat.

Both are digital entrepreneurship **without writing a single line of code**.

Walk-through: how the Ajrak seller tests a new design cheaply.

1. He photographs 3 new Ajrak designs and adds them to the catalogue (cost: almost zero).
2. He sends the catalogue link to his customer broadcast list.
3. After one week he counts the orders per design.
4. He prints more of the design that sold most and stops the one nobody ordered.

He learned what customers want **before** printing a large stock.

REMEMBER IT

Remember "S-T-I-G": digital tools help you **Start, Test, Improve and Grow**. Think: "Start The Idea Growing."

COMMON MISTAKE

Mistake: "Digital entrepreneurship means building a mobile app."

Fix: An app is only one option. A WhatsApp group, Google Form, Facebook page or simple website is often enough, and much cheaper, to test whether people want your idea.

اردو میں سمجھیں

ڈیجیٹل دور میں انٹرپرائیورسپ کا مطلب ہے موبائل فون، سوشل میڈیا، ویب سائٹ، آن لائن فارم اور ڈیجیٹل ادائیگی جیسے ٹولز کے ذریعے کاروبار شروع کرنا، آزمانا اور بڑھانا۔ ہر بار پیچیدہ ایپ بنانا ضروری نہیں؛ وائس ایپ گروپ یا گوگل فارم بھی کافی ہو سکتا ہے۔ اگر لوگوں کو خیال پسند نہ آئے تو زیادہ پیسہ خرچ ہونے سے پہلے اسے بدلا جا سکتا ہے۔

EXAM TIP

Common questions: "Define entrepreneurship in the digital age", "How have digital tools changed entrepreneurship?" and "Give examples of digital entrepreneurship without coding." Write the definition (start, test, improve, grow using digital tools), list 4–5 tools, give the past-versus-today contrast (big investment versus quick, cheap testing), and quote the Instagram cards and the WhatsApp Ajrak catalogue examples.

CHECK YOURSELF

1. List four digital tools that the source mentions.
2. Why is it easier to change a business idea today than in the past?
3. Give one example of digital entrepreneurship that needs no coding.

Answers: 1. Any four of: mobile phones, social media, websites, online forms, digital payments, maps, videos, simple apps. 2. Because a small idea can be tested quickly and cheaply, so if users do not like it the team can change it before spending too much money. 3. Selling handmade cards through Instagram, or a WhatsApp catalogue for Ajrak.
