Chapter 6: Entrepreneurship in the Digital Age

Lecture 17 of 18

6.16 Ethical and Safe Use of Digital Tools

LEARN IT

Digital entrepreneurship should be **responsible**. When collecting user feedback, you must respect:

- **Privacy:** people's personal information belongs to them.
- **Truthfulness:** report results honestly; do not make up numbers or hide bad feedback.
- **Fairness:** treat all users equally.

You should **not collect unnecessary personal information** or **share phone numbers or photos without permission**.

Equity point

A good digital solution should consider users who have **weak internet**, **limited devices**, or **language difficulty**. A design with **large buttons**, **simple Urdu/Sindhi instructions**, and **low data usage** helps ensure **equal access**. *Equity* means making sure everyone, including people with fewer resources, can use the solution.

WORKED EXAMPLE

Worked example: fix an unethical feedback form. A team's canteen feedback form asks:

1. Full name, father's name, CNIC/B-form number, home address. → **Problem:** unnecessary personal data. **Fix:** ask only class (or nothing personal at all).
2. "Upload your selfie." → **Problem:** photos are not needed and could be misused. **Fix:** remove.
3. The team plans to post all respondents' phone numbers in the class group. → **Problem:** sharing numbers without permission. **Fix:** never share; keep responses private to the team.
4. The form is in English only and has a 5 MB video at the top. → **Problem:** excludes users with language difficulty or weak internet. **Fix:** add Urdu/Sindhi instructions and remove the heavy video.

When presenting, the team reports "30 out of 40 would use it again" exactly, without rounding it up to "almost everyone". That is truthfulness.

REMEMBER IT

Ask yourself "P-T-F-E": Is it Private, Truthful, Fair, and Equal-access?

COMMON MISTAKE

Mistake: "More data is always better, so let's collect everything."

Fix: Collect only what you need to answer your test questions. Extra personal data creates risk for users and gives you no benefit.

اردو میں سمجھیں

ڈیجیٹل کاروبار ذمہ داری سے کرنا چاہیے۔ رائے جمع کرتے وقت لوگوں کی رازداری (Privacy)، سچائی اور انصاف کا خیال رکھیں؛ غیر ضروری ذاتی معلومات نہ لیں اور اجازت کے بغیر فون نمبر یا تصاویر شیئر نہ کریں۔ اچھا حل کمزور انٹرنیٹ، محدود موبائل اور زبان کی مشکل والے لوگوں کا بھی خیال رکھتا ہے، جیسے بڑے بٹن، آسان اردو یا سندھی ہدایات اور کم ڈیٹا کا استعمال۔

CHECK YOURSELF

1. Name the three values students must respect when collecting feedback.
2. Give two things students must not do with users' information.
3. List three design features that support equal access.

Answers: 1. Privacy, truthfulness, fairness. 2. Collect unnecessary personal information; share phone numbers or photos without permission. 3. Large buttons, simple Urdu/Sindhi instructions, low data usage.
